

Overview

Every student at Magdalen College School is entitled to an enriching experience of Art, Design & Technology, and Food which enables them to achieve their very best. We place great emphasis on delivering relevant and engaging projects that inspire pupils to develop an honest interest in chasing their aspirations within the faculty subjects.

We currently have high numbers of students taking up GCSE and A Level study across our three disciplines. Outcomes are excellent and consistently improving and are the result of a range of strategies to engage students in creative and practical subjects which enhance their love of learning and their understanding of the world around them.

Our team are committed to constantly raising standards and continually review their practice to ensure each child is given the support needed to achieve their potential. This is an exciting opportunity for the successful candidate to work with a team of subject specialist teachers to continue developing the curriculum, our pedagogy and the best possible provision for every student.

Facilities

Art

- In years 7 – 11, students use a suite of rooms on the Waynflete site in the Dashwood Building which is large, light and airy.
- Post-16 students are provided with a studio space in a 'temporary' classroom on the same site.. Each student has their own work area which enables our students to work uninterrupted on long-term large-scale works.

Design and Technology

- Workshops - 2 are equipped for multi-media work - (wood, metals and plastics)
- One electronics classroom equipped with soldering irons
- One teaching classroom with Spray paint booth and CNC machinery
- The technician's workshop which is well stocked with a good selection of machinery including a laser cutter and 3D printers

Food and Nutrition

- Two excellent Food rooms refurbished in 2022
- An adjoining technician / preparation and storage space

Staff

In addition to the team of teaching staff, the faculty has 3 technicians, providing support in Design Technology, Food and Art.
